Extra Yardage Information for Cover Quilt (coverlet)

I. If you wish to create a lustrous effect in the green area of *Fantasia*, use green fabrics (Fabric B) that range from light to dark in 4 steps. The suggested minimum yardage is listed below. I suggest increasing the yardage to the next increment, so you have extra with which to work. Some fabric need to be straightened more than expected; at other times cutting errors can occur. I think it's better to have more than enough fabric than too little, so I purchase more than I think is needed. Note: If you're substituting another color for Fabric B, you may create luster in the same manner by change the color value from light to dark in your selected color.

Here are my **minimum yardage suggestions.** To be safe, **increase to one more increment.**

Fabric B (Green Fabrics or substitute color)

Fabric B-1	lightest green	4 strips	1/3 yard	(need approximately 10")
Fabric B-2	light green	6 strips	1/2 yard	(need approximately 15")
Fabric B-3	medium green	8 strips	2/3 yard	(need approximately 20")
Fabric B-4	dark green	10 strips	7/8 yard	(need approximately 25")

II. To create luster in the red-violet (Fabric D) areas, use fabric that ranges in value from very light to very dark. The lightest fabrics are placed in the center area of the block and they should become darker as the logs move outward. Note: If you're substituting another color for Fabric D, you may create luster in the same manner by change the color value from light to dark in your selected color.

Fabric D (Red-violet Fabrics or substitute color)

Fabric D-1	lightest red-violet	3 strips	1/3 yard	(need approximately 8")
Fabric D-2	light red-violet	5 strips	3/8 yard	(need approximately 12")
Fabric D-3	medium red-violet	7 strips	1/2 yard	(need approximately 15")
Fabric D-4	dark med red-violet	9 strips	5/8 yard	(need approximately 20")
Fabric D-5	darkest red-violet	11 strips	2/3 yard	(need approximately 24")
Fabric D	chimneys	2 strips	1/4 yard	(need approximately 8")

I hope this helps. Because you will be straightening fabric more frequently, you will be using more fabric than if you used all of the same fabric. Again, I would increase my yardage to the next increment, so that if you have an unexpected happening, you will still have enough fabric with which to work. Have Fun! Joen Wolfrom
